MODERN HOME DECORATION

Jiangsu Zhongbai Medical Technology Group Co., Ltd

Like a rock to stand firm Like an ocean to embrace all

POSTMASTER@ZENAMI.COM

0519-8510 2979

No. 11, Qingjiang Road, Kiribei District, Changzhou City, Jiangsu Province

BRAND ORIGIN

"A pillar in the stream, embracing all rivers"

"A pillar in the river" comes from "Yanzi Chunqiu · Neipian Jianxia", where it is written, "I once crossed the river with you, and a turtle carried the left chariot horse, entering the middle of the river where the pillar stood."

Dizhu Mountain is located in the rapids below the Sanmenxia Dam. The boatman on the Yellow River also calls it "Zhaowola", which is about 30 kilometers away from the urban area. When the water is shallow in winter, it emerges more than 20 feet above the surface; during the flood season, it only exposes a spire, appearing as if it is about to be swallowed by the floodwaters, which is extremely thrilling. For thousands of years, no matter the invasion of violent storms or the scouring of tumultuous waves, it has always turned the tide and stood majestically in the Yellow River, like a fierce lion occupying its territory, strong and fearless. It has been symbolized as the spirit of the Chinese nation since ancient times.

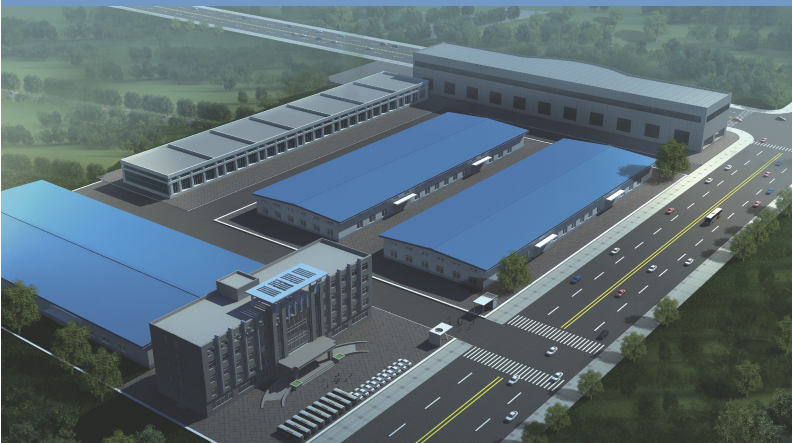

In 638 AD, Emperor Taizong of the Tang Dynasty, Li Shimin, came here and wrote the poem "Looking up to the pillar, gazing north to Longmen; the vast traces of Yu, the vast spring everlasting". He ordered his minister Wei Zheng to inscribe it on the pillar. The calligrapher Liu Gongquan also wrote a long poem about it, including such excellent lines as "A lone peak floats on the water, a pillar stands firm in the heart of the waves. It withstands the dangers of the three gates, its roots are deep in the nine bends. The pillar rises abruptly, following the waves up and down".

"Haining Baichuan" comes from Yuan Hong's "Preface to the Eminent Officials of the Three Kingdoms" in the Jin Dynasty, which reads: "When forms and vessels are not preserved, the heart can accommodate all." Li Zhouhan commented: "The heart, like a square inch, can accommodate all rivers, indicating its vast inclusiveness." It means that the sea can hold the water of hundreds or thousands of rivers. It is a metaphor for something that is very inclusive and vast in quantity.

"In 'Selected Works · Yuan Hong's 'Preface to the Eulogy of Famous Officials in the Three Kingdoms', it is written: 'When the form and substance are no more, the heart can accommodate all.' Li Zhouhan annotated: 'The heart, like a square inch, can accommodate all rivers like the sea. It signifies its vast inclusiveness.' In the preface to 'The Horse Shooting at Hualin Garden on the Third Day of the Third Month' by Yu Xin of the Northern Zhou Dynasty, it is written: 'The Tai Shi listens to the drums and judges the merits, while the Sima Zhangzhan rewards the achievements. Above, the clouds spread and rain falls; below, mountains hide and seas accommodate.' In the middle volume of 'Yunxi Youyi' by Fan Shu of the Tang Dynasty, it is written: 'Han Gong said, 'The historiographer is the pivot of the country. How can he be as drunk as the sea accommodates?'"

Enterprise Introduction

Jiangsu Zhongbai Medical Technology Group Co., Ltd. (abbreviated as Zhongbai Technology) is a high-tech enterprise strategically restructured from three innovative technology companies: Jiangsu Zhongbai Medical Technology Co., Ltd., Jiangsu Zhongbai Nano New Material Technology Co., Ltd., and Jiangsu Zhongbai Intelligent IoT Technology Co., Ltd. It specializes in the research, development, production, and sales of medical novel materials, medical customized furniture, and intelligent storage cabinets. Its headquarters and R&D base are located in the scenic Changzhou Science and Technology Industrial Park, and it has branches across the country.

Since its inception, the company has consistently adhered to the concept of "green, environmental protection, and high efficiency and intelligence". It aims to provide a high-quality medical experience for patients, and strives to create a safe, reassuring, and quiet medical space. The ultimate goal is to build a modern, smart healthcare and elderly care environment that offers care and comfort to both doctors and patients.

With the vision of "creating green, environmentally friendly, and efficient smart products" and the strategic positioning of "being the main force in technical support and a comprehensive service provider in the industry", Zhongbai Technology has taken the lead in establishing a full industrial chain layout from research and development design, production and sales, to construction and operation in the national medical field.

The company has currently been awarded multiple honorary titles, including "High-tech Enterprise in Jiangsu Province", "Private Technology Enterprise in Jiangsu Province", "Technology-based Small and Medium-sized Enterprise in Jiangsu Province", "National 315 Integrity Demonstration Enterprise", "Contract-honoring and Promise-keeping Enterprise", and "AAA-level Credit Rating". It holds more than 50 utility model patents and invention patents, and has passed multiple management system certifications such as "ISO13485" for the medical device industry management system, as well as ISO9001, ISO14001, and ISO45001. Its products have been awarded the title of "China Green Environmental Protection Product".

In the future, Zhongbai Technology will undoubtedly advance towards the goal of becoming a leading enterprise group in the industry with a high sense of responsibility, an energetic spirit, and a solid work ethic. It will continue to write a new chapter in history and forge new glories for modern enterprise development.

PRODUCTION BASE

Located in Shuyang—renowned as the Flower Nursery Capital—our manufacturing facility spans 20,000 square meters, with 10,000 square meters dedicated to standardized factory buildings.

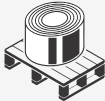

Expertise & Workforce:

- Total Employees: 100+
- Technical Team: 20+ engineers
- Senior Technicians: 10+
- Mid-Level Technicians: 30+
- Industry Experience: 20+ years in sheet metal fabrication.

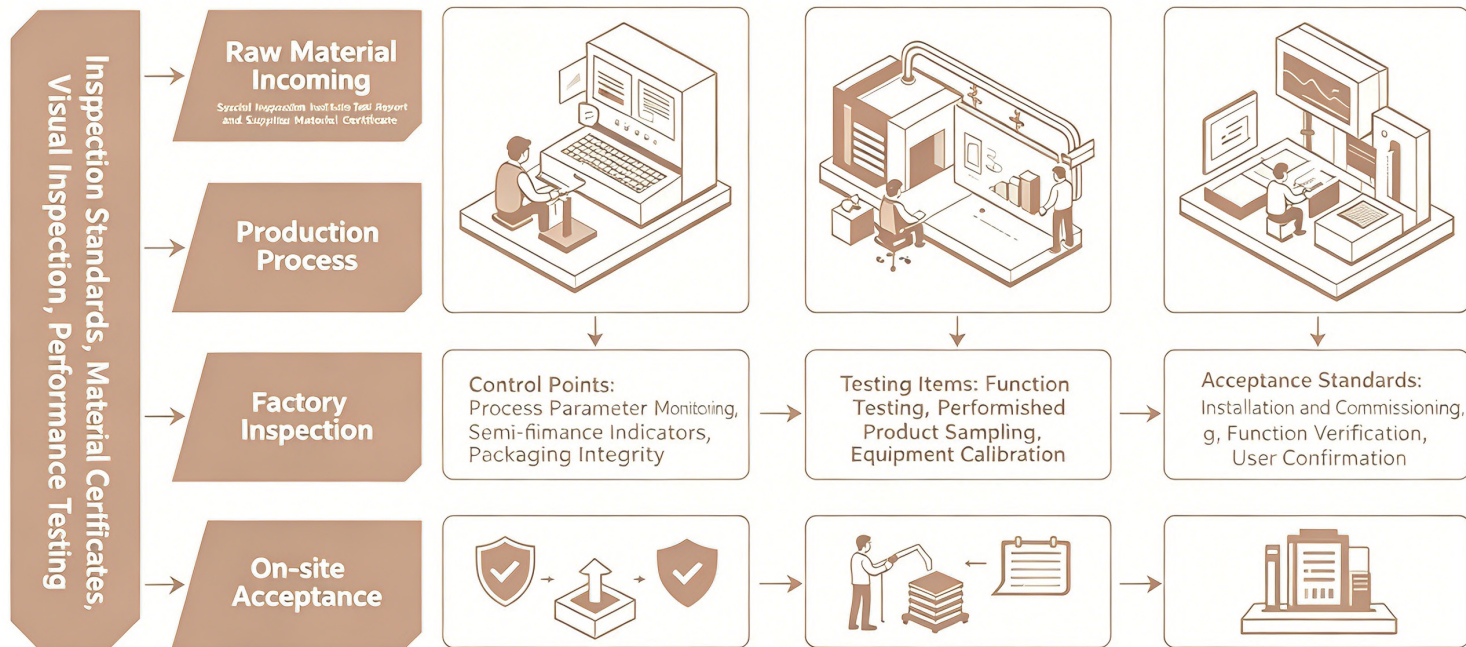

Core Capabilities:
We provide integrated solutions including:

- Sheet Metal Processing: Laser cutting, CNC turret punching, bending, welding
- Equipment Production: Customized machinery systems, assembly line manufacturing
- Comprehensive Services: Truly integrated operations encompassing shearing, bending, cutting, grinding, welding, and coating to meet diverse client requirements.

 200,000+ Sets/year Production Capacity	 100 million Yuan/year Sales Value	 200+ Hospital/year Customers
 Optimal Material Substrate: Baosteel SECC electro-galvanized steel plate Surface Coating: AkzoNobel epoxy resin powder Surfacing Material: DuPont Corian acrylic solid surface Hardware: Häfele slides, hinges, and locking systems.	 Latest Technology Blanking: Laser cutting of coiled material using an intelligent production line for blanking Forming: CNC bending center for shaping Welding: Resistance welding, grinding, and shaping Coating: Fully automated tunnel-type pre-treatment + spraying assembly line.	 The Best Product Delivers value to users: Solves key user pain points & addresses core needs. Creates value for the company: Drives profit, builds strong brand reputation, and unlocks future growth potential. Contributes value to the market/society: Addresses critical societal challenges and alleviates broader pain points.

CORPORATE CULTURE

Management idea

We aim to integrate production, education, and research to create innovative, technologically advanced, and vibrant products. By adhering to service standards that surpass both domestic and international benchmarks, we strive to meet customers' evolving needs for our products.

Service idea

No matter how small the matter may seem, it is important to treat it with utmost attention and care when dealing with customers.

Enterprise spirit

Integrity and commitment, people-oriented, customer first, pioneering and innovative.

Enterprise mission

Let technology serve human life,
Let life benefit from technological progress,
Let Zhongbai become the cradle of technology
and the builder of a better life.

Enterprise purpose

With technological talents as the foundation of the enterprise,
and adhering to a style of integrity and pragmatism,
Continuously achieve technological innovation, and give back
to and serve society.

Every step in the past has been steadfast and significant
It is precisely because we are moving forward step by step
It is what makes us go further and stronger

OVERALL SOLUTION

Intelligent Operating Room Behavior Management System

Enhances the service quality of the operating room: All information systems automatically record and transform medical behaviors into standardized, traceable processes through the system. Data analysis is conducted via a data middleware platform to improve and implement various management tasks in the operating room across multiple dimensions, including policies, execution, tracking, and handling.

Medical Eco-Friendly Traditional Chinese Medicine Cabinet

The overall construction of the steel TCM cabinet utilizes electrolytic steel plate processing, making it exceptionally durable. The structure of the electrolytic steel plate is stable and unlikely to cause any reaction affecting the medicinal efficacy of Chinese herbal medicines.

Medical Eco-Friendly Sterile Shelving

Designed in compliance with hospital infection control regulations, the shelving system features standardized zoning for enhanced organization. The product configuration is rationally tailored to meet the storage requirements of different items. With its standardized design, the shelving fully meets clinical demands.

Medical Eco-Friendly Pharmacy

For pharmacies with vast storage capacities, the storage of medicines is crucial. This includes valuable medicines, commonly used medicines, refrigerated medicines, dry storage of medicines, as well as the verification and dispensing of medicines.

Smart and Eco-Friendly Main Service Desk

Integrating functions such as guidance and consultation, health insurance inquiries, appointment and referral services, and convenience services, the rationally planned spatial layout allows the product to blend seamlessly into the overall decorative environment. The humanized design, combining high and low counters, facilitates both work and communication. Built-in cable management space for electrical and data lines meets future expansion needs without limitations.

Multi-functional Lecture Hall

With a simple shape and intelligent connotation, it integrates modern humanistic design language and distinctive style characteristics to create a leadership demeanor and bring users a space with natural texture.

Environmental Doctor's Office

The spatial scale is rationally analyzed and studied to customize combined desks, which not only play a load-bearing role but also avoid a messy appearance. The design of wall cabinets further enhances storage functionality. The beveled ceiling design reduces dust accumulation and facilitates cleaning, thereby improving the work efficiency and satisfaction of medical staff.

Eco-Friendly Furniture Administrative Office

The supervisor desks with varying heights are separated into main and side platforms, reserving ample space for office equipment. Minimalism is implemented in every detail; the flip-top cable management box organizes messy wires, making work more efficient.

Eco-Friendly Furniture Meeting Room

Clean and sharp lines outline a stylish and efficient meeting space. The natural wood desktop paired with steel legs creates a striking contrast between raw nature and modernity. Within the square structure, the charm of the times is highlighted, while flexible cable management enhances office efficiency.

Pediatric Infusion Chair

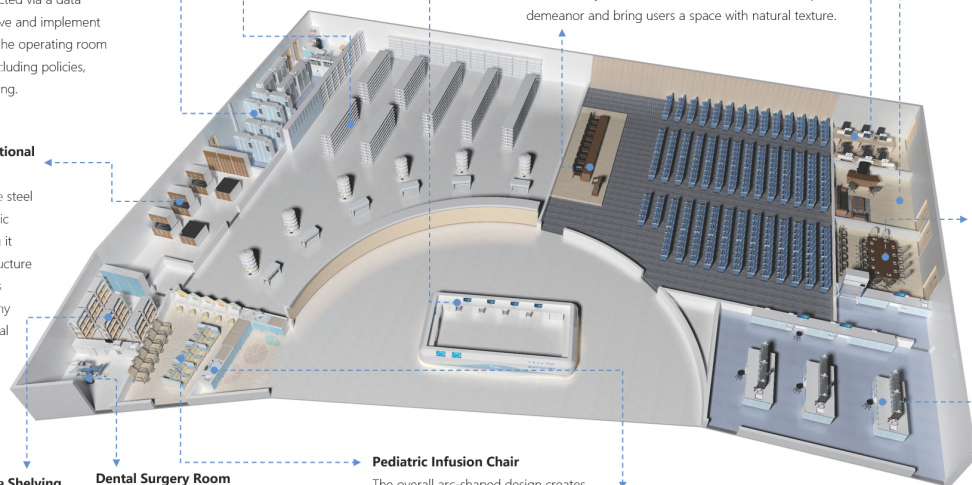

The overall arc-shaped design creates a sense of warmth and familiarity. The pull-out companion chair at the lower level and the spacious storage drawer effectively help alleviate parents' physical and mental fatigue. The space features a warm and soothing color palette throughout.

Medical Children's Intelligent Baptism Pool

High-molecular composite material: Non-toxic, harmless, and safer.
Functional and tactile design: Complete functions with a high-quality, smooth, and gentle surface texture, free from a cold touch; won't scratch the skin.
Advanced technology and safety: Adopts the latest international IMD technology with full-screen touch control, and features high-temperature water cutoff protection.

Medical Environmental Test Bench

Compared with other inspection areas, the chemical inspection area is equipped with larger machines. Therefore, it is required to simulate the machine configuration in advance and conduct zoning planning with full consideration of the working space and workflow.

厚德精医
仁爱至诚

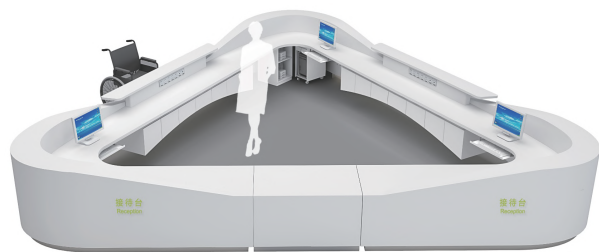

ABOUT PRODUCT

The product design meets the requirements of multi-function and ergonomics. The size, size, shape, line, soft and hard of the product strive for comfort. The product is designed to be closer to the actual needs according to different people. At the same time, it combines aesthetics to create novel, fashionable and personalized products, and creates an overall environmental protection and green solution according to the requirements of the hospital.

SERVICE CENTRE

Both the shape and color of the service center are very exquisite. The round standing body and the square space highlight the momentum of the hall. The curved corner avoids meeting the passers-by, so the corner butt joint is sharpened, and the arc treatment is more convenient for office and communication.

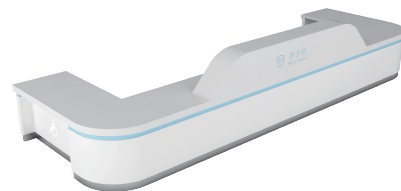

Service Centre

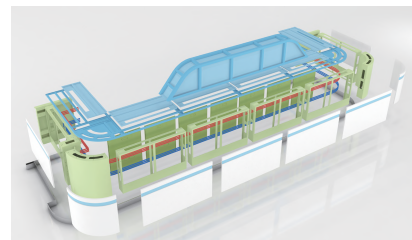

DESIGN TRENDS

From the perspective of vision and use, the nurse station is the core of a specific area, and the temperament displayed in the design of the nurse station must become the dominant factor in this space; People need to design a nursing station that conforms to or can guide psychological identification, which is refreshing, natural, warm and comfortable

Structural Disassembly Diagram

REGISTRATION AND TOLL COUNTER

P roduct description

Compared with other public spaces, the medical space is the external window of the hospital. "Zhongbai" strives to let staff work in a comfortable, efficient and convenient environment, saving precious time for patients.

With the fashionable, noble and elegant style,
Bopai doors should be the ideal choice of modern residential decoration.

PHARMACY

With the fashionable, noble and elegant style,
Bopai doors should be the ideal choice of modern residential decoration.

Product description

The "Zhongbai" drug store pharmacy series products are divided into shelf series, western medicine cabinet series, drug rack series, Chinese medicine cabinet series, drug delivery vehicle series, etc., which are suitable for the use of space such as primary drug store, secondary drug store, central pharmacy, western pharmacy, and traditional Chinese medicine store, to ensure the orderly operation of the hospital system.

P roduct description

The "Zhongbai" drug store pharmacy series products are divided into shelf series, western medicine cabinet series, drug rack series, Chinese medicine cabinet series, drug delivery vehicle series, etc., which are suitable for the use of space such as primary drug store, secondary drug store, central pharmacy, western pharmacy, and traditional Chinese medicine store, to ensure the orderly operation of the hospital system.

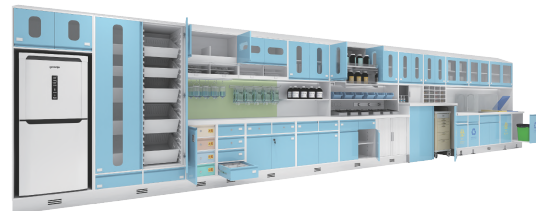

TREATMENT ROOM

The treatment room is located near the nurse station, which is mainly a special workshop for medical staff to prepare for treatment and allocate for the pharmaceutical industry; The room is equipped with a special operating platform (sterile articles are placed separately), a wall cabinet, a medicine cabinet (oral liquid and injection are separated), a medicine dispensing cart, a treatment cart, various nursing and treatment appliances, infusion materials, various syringes, instruments, etc., as well as air disinfection equipment, hand washing basins, refrigerators, etc; Indoor cleaning and pollution shall be managed in different areas.

The treatment room is the main place for the nurses in the ward to carry out the prescription of infusion and medication. The room has strict requirements for high cleanliness, meets the ergonomic structure of the operator, and is prepared for rapid supply and recovery of medical articles. The classification and treatment of pollutants is a factor that must be fully considered in the design and configuration of the furniture in the treatment room; The main material of the cabinet body is waterproof, moisture-proof plate or first-grade electrolytic steel plate, which is durable and not easy to deform. The operating table is made of acid-proof and alkali-resistant physical and chemical plate or medical artificial stone which can be formed and connected seamlessly.

DISPOSAL ROOM

Hospital infection has become a prominent problem in the global modern medical community. It not only increases the pain of patients, but also increases the workload of medical staff; Therefore, according to the current situation, each area of the disposal room has been divided into physical space and a closed garbage collection and classification system; According to different design spaces, make reasonable planning and customize different types of products that meet environmental requirements; The garbage can of the disposal cabinet is divided into domestic garbage, medical garbage and sharp garbage.

LABORATORY

For different kinds of laboratories, such as washing room, high temperature room, gas cylinder room, mercury containing laboratory, constant temperature and humidity laboratory, clean laboratory, large instrument room, different ground treatment methods are adopted; Ensure that the calculation parameters in the air conditioning room of the laboratory in summer are controlled within the scientific range, so as to provide a safe, comfortable and healthy working environment for the laboratory staff.

STOMATOLOGY DEPARTMENT

P roduct description

Dentistry is mainly used for oral surgery, examination and treatment of oral diseases; Most of the electric dental chairs are used. The base plate of the whole machine is fixed on the ground, and the base plate is connected with the upper part of the dental chair through the bracket. The action of the dental chair is controlled by the control switch on the back of the chair. According to the treatment needs, the control switch button is operated, and the dental chair can complete the actions of rising, falling, pitching, reclining and resetting.

DIRT WASHING ROOM

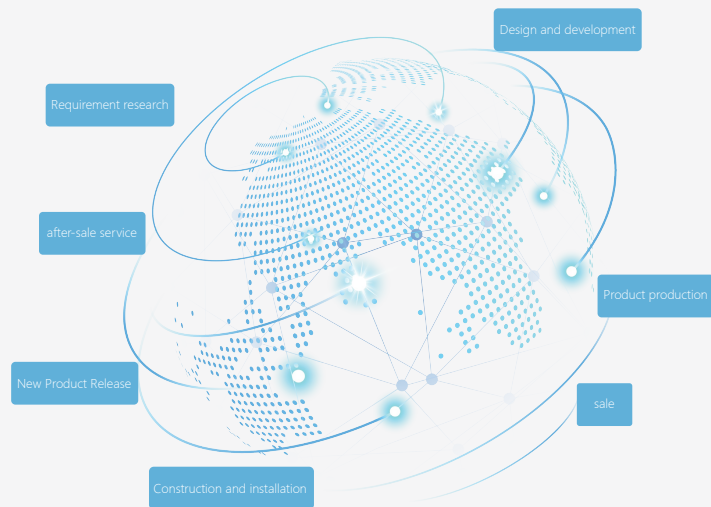

In terms of functional design, we should consider the classification of cleanliness and contamination levels of hospital articles, emphasize the prevention of cross infection, and fundamentally provide safe and clean use environment for medical personnel; The main design of the medical floor cabinet is that the furniture designer of Zhongbai Hospital drafts the design according to the customer's requirements, combined with the specific environment of the hospital and the hospital's cultural concept, so as to meet the requirements of the actual internal situation of the hospital; During the design process, we constantly communicate with customers.

Nursing treatment space solution

SPACE

Provide a detailed overall medical furniture solution for each nursing and treatment space, with a functional layout that conforms to the second level process and various functional rooms that meet the requirements of the third level medical process, to avoid cross infection within the hospital and build the most comfortable logistics system for nursing and treatment spaces.

High quality fashionable medical furniture products

In order to reflect customer needs in the product, all employees of Zhongbai Technology need to perceive customer demand trends; Before carrying out the planning and design work of medical furniture, professionals from Zhongbai Technology will assist hospital users in preparing a design task book through in-depth conversations and discussions with users, investigating the current usage of hospitals, visiting and inspecting existing hospitals with considerable scale conditions, and other methods. This will serve as the basis for designing medical furniture, providing confirmation to the hospital, and modifying and improving the design plan; Based on the strong, professional, and efficient production capacity of Zhongbai Technology, we provide high-quality fashionable medical furniture products for the hospital

WAITING AREA

In all the surveys of patients' dissatisfaction with the hospital, "waiting time is too long" ranked first; In order to warm and heal the patients' psychological and physical space, "Zhongbai" understood the patients' actual dissatisfaction and nonverbal potential dissatisfaction through listening and investigating the patients in the waiting hall of the hospital, and put forward countermeasures to alleviate the dissatisfaction, and realized the comfortable waiting space of the waiting hall by starting with the functional, comfortable, clean, safe and other aspects of the medical furniture in the waiting room.

ABOUT PERFORMANCE

Zhongbai combines the current advanced anti-corrosion technology and new materials for antibacterial, with excellent antibacterial durability, corrosion resistance and stable metal properties; Zhongbai provides you with timely and considerate product sales and after-sales service. After years of accumulation, our business covers all over the country. We provide you with satisfactory service with integrity, innovation and pragmatism.

01 Jiangsu Provincial People's Hospital

HOSPITAL INTRODUCTION

Jiangsu Provincial People's Hospital, also known as the First Affiliated Hospital of Nanjing Medical University and Jiangsu Provincial Red Cross Hospital, has a history of over 70 years, tracing back to its predecessor, the Medical Clinic attached to Jiangsu Provincial Medical and Political College, established in 1936. It is the largest comprehensive hospital in Jiangsu Province, undertaking the three central tasks of medical treatment, teaching, and scientific research for the entire province.

Shanghai China Welfare Institute International Peace Maternity and Child Healthcare Hospital

HOSPITAL INTRODUCTION

The Shanghai China Welfare Institute International Peace Maternity and Child Healthcare Hospital was founded in 1952 by Mr. Song Qingling, one of the founders of New China, the Honorary President of the country, and the founder of the China Welfare Institute. It adheres to the mission of "serving women and children wholeheartedly" and has been awarded the National "May 1st" Labor Award and the Advanced Collective in Culture, Education, and Health, the Shanghai "May 1st" Labor Award, the Model Collective, and the Shanghai "Civilized Unit". It has been named one of the National Top Ten Model Baby-Friendly Hospitals, a National "Baby-Friendly Healthcare Hospital", and a "Mother-Baby Friendly Hospital".

03 People's Hospital of High-tech Zone, Leshan City, Sichuan Province

HOSPITAL INTRODUCTION

Leshan People's Hospital is located on Baita Mountain, which faces the Leshan Giant Buddha Scenic Area, a world natural and cultural heritage site, across the river. Its predecessor was the "Jiading Gospel Hospital" and "Renji Hospital" founded by Dr. Qierde, a doctor from the United Church of Canada, and it was established in 1894. In 1952, the People's Government merged "Renji Hospital" with the "Public Leshan Central Health Center" established by the National Government in 1942 to form the "Leshan Special Area Hospital". In 1985, it was renamed "Leshan People's Hospital" with the change of the city from a prefecture to a city. The hospital's main headquarters is located on Baita Street in the central district of the city, and it passed the national "Grade A" comprehensive hospital accreditation in 2009.

06 Maternity and Child Healthcare Hospital, Wanzhou District, Chongqing

HOSPITAL INTRODUCTION

In 2021, the hospital underwent a reorganization and relocation, becoming a tertiary maternal and child health care hospital. Currently, the hospital employs 124 staff members, with professional and technical personnel accounting for 88.5%. This includes 15 chief physicians and 31 attending physicians (including technical and nursing specialists). The technical strength and diagnostic and treatment capabilities of the obstetrics and gynecology department and pediatrics department are among the best in Wanzhou District

07 Chengdu BOE Hospital

HOSPITAL INTRODUCTION

A modern tertiary general hospital integrating prevention, medical treatment, teaching, scientific research, healthcare, and rehabilitation, invested and constructed by BOE Technology Group. Located in Chengdu Tianfu International Biotech Town, the hospital covers an area of 354 acres, with an initial investment of 6 billion yuan, 2,000 beds, and a building area of 380,000 square meters. Adhering to the principles of "innovation in hospital establishment, openness in hospital management, characteristics to revitalize the hospital, and technology to strengthen the hospital", the hospital applies the latest technological achievements to build a leading smart hospital in the industry. It aims to comprehensively construct a new type of hospital that is considerate to patients, featuring "excellent medical ethics, superior technology, quality service, affordable medical care, and a beautiful environment", benefiting society, serving the public, and contributing to human health and happiness.
